

SCANTECH

Let's Rebuild The 3D World

About Us

SCANTECH(HANGZHOU)CO.,LTD is a high-tech enterprise specialized in the development, manufacture and sale of intelligent visual inspection equipment.

Our **R&D team** developed series of 3D digital equipment with self-owned intellectual property rights, such as handheld laser 3D scanner, global 3D scanner, white light 3D scanner, tracking 3D scanner and global photogrammetry system and so on. Especially we focus on multi-laser technology from red & blue laser to infrared & blue laser, which is a global creative initiative, gaining great attention and recognition in the 3D digital field.

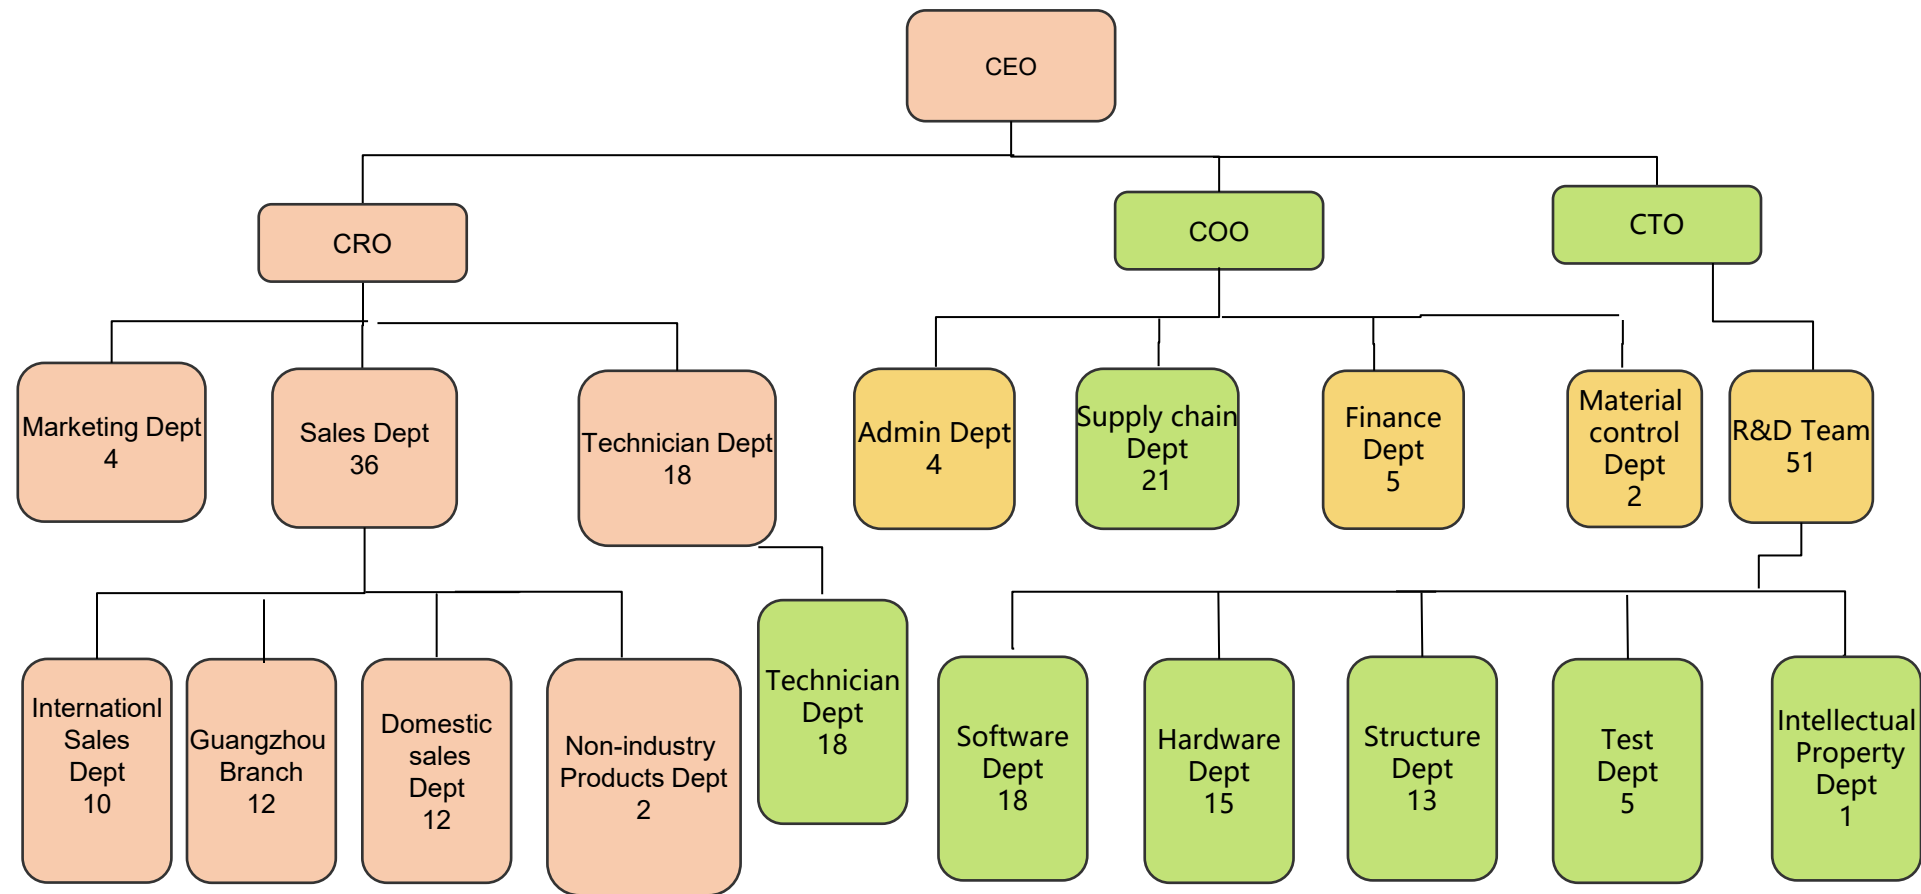

Furthermore, R&D team established a joint development center with Norway Metronor which is a well-known optical metrology enterprise in Europe.
